

The Cubiflow range of vertical-discharge U-shaped condensers are fitted with all-aluminium microchannel heat exchangers. High performance axial fans and the unique arrangement of the condenser sections allows for optimal airflow. Also available in horizontal-discharge format.

The microchannel profile ensures a lower refrigerant charge, less air and refrigerant pressure drop as well as excellent heat transfer performance in a compact and flexible configuration. Condenser sections can be mounted back to back or lengthwise and can be wall-mounted.

Cubicool International is committed to ensuring its products are designed, manufactured and assembled to operate in the most energy-efficient manner possible, using the latest available technologies and design methodologies in keeping with best industry practice
