

Cubiplex multiplex systems are fitted with semi-hermetic compressors (up to 6), with oil management system. Units can be fitted with integrated air-cooled condensers (horizontal- or vertical- discharge), if required, selected for optimal performance and to minimise plant capital costs.

Large units are fitted with a proprietary accumulator manifold, with integrated liquid subcooling coil. Other energy-saving features include Liquid Pressure Amplification (LPA) systems, virtually stepless unloading systems (Cubidrive) and soft starters.

Units are fitted with an electrical panel including compressor, condenser fan and electronic management systems, safeties and other accessories. All Cubiplex systems are fully factory tested and rigorously checked prior to shipping.

Cubicool International is committed to ensuring its products are designed, manufactured and assembled to operate in the most energy-efficient manner possible, using the latest available technologies and design methodologies in keeping with best industry practice
